

Walk from the Station to the School of Computing

1. When you come out of the railway station building turn left and walk past the roundabout immediately outside the railway building until you come to the main road. Do not cross the road.
 2. Turn left and walk along the side of the road past three office blocks on the left hand side. Then take the turning on the left where there are traffic lights.
 3. Walk down this road and you will see the "Sensation" Building in front of you across a car park and the "DCA on the right-hand side.
 4. In the corner between the Sensation Building and the DCA i.e. on the right hand side of the Sensation building, there are two sets of steps going up the hill. Take the left hand set of steps which take you into the car park of the Queens Hotel.
 5. Walk past the Queen Hotel and cross the road at the pedestrian crossing and turn left.
 6. About 30 m further on the University Tower Building will be on your left. Walk past this building and turn right into Small's Wynd.
 7. Walk up Small's Wynd under a part of the University Tower building, past the library on the left hand side, and Ewing building (with large satellite dish on the top) on the right. Please note that the library is currently being extended so there may be some diversions in place.
 8. Past the library turn left into cross row where there are some old houses on the right hand side and the Chaplaincy centre is in front of you.
 9. At the end of cross row next to the Chaplaincy Centre the road turns to the right and the Queen Mother Building is the outstanding example of architectural excellence in front of you across the car park.
- PS if you get lost on the University ask for the Chaplaincy Centre and then look for the white building made from lots of round towers.
